

## MUST NOT USE CENTRAL PARK TO TRAIN MEN

Commissioner Hermann  
Gives N. Y. Transporta-  
tion Co. Body Blow.

Park Commissioner Moses Hermann dealt a severe blow to the New York Transportation Company this afternoon when he notified the company that it cannot use Central Park as a training ground for the strike-breakers it has employed to take the places of strikers. There have been several accidents in the park, caused by men who did not know how to operate the electric cars. Other vehicles have been run into and trees broken.

As the company has depended on Central Park as a place in which to drill the strike-breakers, and as their garages are not large enough for that purpose, the company found itself seriously handicapped.

One of the strike-breakers to-day caused a small panic on Fifth avenue at Fifty-seventh street, and was arrested on the demand of a woman into whose cab he ran his machine. Not knowing how properly to operate the vehicle, the strike-breaker, Carter Fox, of No. 42 East Eighty-third street, caused to navigate "the most perilous thoroughfare in the city, and was bowling down Fifth avenue, with a Pinkerton on the box with him and a bicycle policeman following to protect him.

**Crashed into Hansom.**

A hansom cab driven by James Golden and belonging to C. L. Pitney, and having a woman as a passenger, was turning from Fifty-seventh street into Fifth avenue. The crossing policeman motioned for the electric car to stop, but Fox did not stop and crashed into the hansom, breaking one of its springs and nearly throwing the woman out.

When the occupant had climbed from the cab she ordered the bicycle policeman to arrest the strike-breaker. He was guarding, and he did. Fox was taken to the East Fifty-first street station and from there to the Yorkville Court. The accident blocked Fifth avenue for a half hour and caused much trouble in the vicinity. Police from many points had to go to Fifth avenue to straighten out the tangle and get the carriages moving. The electric car was left stranded in the street, the bicycle policeman preferring to walk his prisoner to the station.

**"Jim" Farley Not Retained.**

"Jim" Farley, the strike-breaker, has not been retained by the New York Transportation Company to break up the strike of its 500 electrical car chauffeurs. This statement was made to-day by the company's President, Richard W. Mead.

"We don't need Farley," he said to the reporters, "we now have all the men we want, and as soon as they have been schooled in the operation of the cars they will be sent out. But it doesn't require any time to run these machines. I learned how to do it in

two hours. We were paying our men higher wages for unskilled labor than any one else.

"We have determined not to treat with the union in any way whatever. We will not receive any delegation from the union, but if the men, as individuals, wish to come back, we will listen to their proposition, but only as individuals. I am determined to break up this strike if it takes a year or longer.

No attempt was made to-day, the sixth day of the strike, to operate cars for public service. The discouraging experience of yesterday, when several cars met accidents led the officials to believe that it would be risking valuable property to trust the cabs on the streets with the strike-breakers.

In Yorkville Court to-day, Magistrate Cornell, who has shown the strikers no quarter, sent Michael O'Grady, a striker, to the workhouse. O'Grady was standing on the sidewalk yesterday when strike sympathizers threw stones at one of the automobiles. He denied that he threw any stones.

John Travis, another striker who was arrested by a policeman, who said he called "Scab!" to a strike-breaker yesterday, was fined \$10 by the same Magistrate.

## DAY OF LAX BELIEF, SAYS DR. MANNING

Deplores Conditions at Cele-  
bration of St. Paul's 140th  
Anniversary.

The Rev. Dr. William T. Manning, assistant rector of Trinity Parish and vicar of St. Agnes's Chapel, in West Ninety-first street, one of the principal speakers at the celebration of the one hundred and fortieth anniversary of St. Paul's, to-day told a gathering that taxed the capacity of the building that this was a day of lax beliefs.

"We must get together," he said, "and stand firm for the faith, for there are thousands to-day who believe in laxity and unbelief must inevitably be together."

He adjured those who he declared would lead the faith from its moorings, and continued:

"It seems to most of us that the social, religious and moral conditions of our day are particularly grave. Some one has said that there are no good old days for the Church of Christ, and sometimes I think it so. If this be, as some say, a crucial time, then it is one fraught with grave responsibilities for us.

"Tendencies about us are toward the weakening of the faith. The air is full of particular contention what a man believes in he lives a clean life. And we hear, too, that confidence and ship inevitably lead a man away from the faith. It is time for us as churchmen to stand by our guns, to show the strong grounds of our faith, and that we are not ashamed of the Gospel."
